Nuvera Gig Cities to Provide Gig-Speed Fiber Internet Across Service Areas

In late 2021, Nuvera announced they would be investing significant resources into building Nuvera Gig Cities, an initiative that will expand Gig-speed fiber Internet service across the communities that they serve.

"This is a transformational moment for Nuvera as we make a future-focused investment in the communities we serve by providing the most reliable fiber-to-the-home access to Gig-speed services," said Glenn Zerbe, Chief Executive Officer, Nuvera Communications. "Our homes, businesses and communities need reliable and affordable connections to school, workplaces and entertainment, as an important and growing part of everyday life."

Nuvera's Gig-speed fiber network will build on the expansive fiber work that happened in many communities in 2021 and will be available to thousands more customers in 2022. Nuvera will continue to build and deploy the Gig-speed service over the next few years.

While Nuvera's goal is to bring Gig-speed service to as many communities as possible, the initial buildout will focus on the following cities and surrounding communities:

- New Ulm
- Hutchinson
- Glencoe
- Goodhue
- Litchfield
- Redwood Falls
- Prior Lake
- Elko New Market
- Savage
- Sleepy Eye
- Springfield
- Aurelia, IA

Nuvera is just getting started and these cities are the focus for building and deployment in the initial phase. Nuvera's goal is to get to as many communities as possible. You can find out more about Nuvera Gig-speed Internet, check availability or request notifications about when new service is available in your area by visiting NuveraGigCities.com

Cybersecurity is More Important Than Ever

Cybersecurity may have been back of mind for many for years, but reports of online crimes have started to grow. Thanks to COVID-19 and the increase of internet usage, your online information may be more vulnerable than ever. In fact, Since COVID-19, the FBI has reported a 300 percent increase in reported cybercrimes, according to a report in The Hill.

Here are a few basic tips to help keep you safe online:

Keep your software current – It may be a hassle when your computer takes a time out to install updates but often, those updates include important safety measures that will help keep you safe in the long run.

Use strong passwords – Don't use the same password twice; use something that is easy to remember but difficult for hackers to guess; use a password manager to keep multiple passwords safe without having to memorize them all.

Be suspicious of links or messages from people you don't know –

Phishing attacks are some of the most prominent cyber scams out there and they are getting craftier. If you think a link is suspicious,

it probably is. Hover over a link to see what the URL really is before clicking on it.

Secure your cell phone – Security measures should include your mobile devices, not just desktop and laptop computers. Use strong passwords and face or thumbprint recognition. Don't connect with public Wi-Fi, especially if you will be accessing sensitive apps like banking or anything that contains personal or financial information.

Stay vigilant – Don't think it can't happen to you. Take every proactive step you can to keep hackers and scammers out of your personal information and your devices. Once they've gained access, the damage can be extremely difficult to reverse.

If you think you've been hacked or if you are interested in finding out how to keep your online presence more secure, our technical support team can help: call 844.354.4111.

Access Your Home Network Quickly, Easily with Home Wi-Fi

Home Wi-Fi is a great option for customers that want a fully hosted solution with tools to monitor their home's bandwidth, devices and coverage. Download the Nuvera IQ app and manage your network with the following features:

Parental Control
Guest Network • Device List
Network Usage
Enable/Disable Applications
Bandwidth Monitoring

Call 844.354.4111 to get started.

Refer your friends and family to Nuvera and get rewarded!

Current customers who refer a friend to Nuvera Internet, TV or Nuvera Wireless service will receive a \$50 bill credit! This offer is \$50 per service and there is **no limit** on the number of referrals. It's simple.

All the new customer has to do is mention that you referred them to our service, and you will get a credit on your next bill.

Martin Luther College (MLC) has chosen to partner with Nuvera for all their Internet and ethernet needs. Nuvera's solution will provide MLC with two fully redundant, 10GB fiber ethernet circuits to deliver the college and its students the bandwidth they need now and into the future. Pictured are (l-r) Brandon Schmiesing, Nuvera Territory Sales Manager; Jeffrey Schone, MLC Vice President for Student Life; and Robert Martens, Network Services.
