

How to Update Country Restrictions

1. Go to [MagicMail Server: Login Page \(nuveramail.net\)](https://nuveramail.net)
2. Log in with your account information.

The screenshot shows the MagicMail interface. The top left features the MagicMail logo with the tagline "Protecting Your Email". The top right displays the Nuvera logo and a "Logout" button. A navigation sidebar on the left includes links for Home, Webmail, Spam Management, My Email Options, Security Options, Manage Mailboxes, and Logout. The main content area is titled "Security and Authentication Settings" and contains a "Change Password" section with fields for Current Password, New Password (with a "(min 12 chars)" note), and Confirm Password, along with an "Update Password" button. Below this is a "Manage Security Policies" section.

3. To access the Country Restrictions:
 - Click on Security Options and scroll down.
 - Using the arrow button, move the countries you want to allow and/or block access to. Click "Save Country Restriction".

The screenshot displays the "Countries I Can Access My Email From" settings page. It includes an introductory paragraph explaining that users can set restrictions on which countries they can access their email from. Below this, it states the user is currently logged in from the "United States" and provides a note about the data source: "Note: Locations are a best-effort lookup via GeoLite2 data created by MaxMind". The page is divided into two columns: "Allowed Countries" and "Blocked Countries". The "Allowed Countries" list includes Canada, Mexico, and "System Enforced" (United States). The "Blocked Countries" list includes Afghanistan, Aland, Albania, Algeria, American Samoa, Andorra, Angola, Anguilla, Antarctica, Antigua and Barbuda, Argentina, Armenia, Aruba, Australia, Austria, Azerbaijan, and Bahamas. There are "Select All" buttons for both lists and arrow buttons between them to move countries. A "Save Country Restriction" button is located at the bottom right.
